

SITE RECONFIGURATION AND GEOPIERS

Existing Site to be Reconfigured

PROJECT LOCATION:

Laguna Hills

PROJECT SCOPE:

The proposed Site Reconfiguration and Geopiers consists of the demolition of the existing pavement surfacing and mechanical appurtenances, and the completion of ground improvements to maximize the available space and stabilize the soft, native soils as necessary for new facilities.

Construction documents for the project were prepared by Ware Malcomb.

PROJECT DETAILS:

- Contract Award - 05/23/2019
