

## Spring into Water Efficiency with Moulton Niguel!

Winter is coming to a close, so spring into the new season with renewed water efficiency efforts! Just a few small changes to your water use can help you use water efficiently this season. Remember, it's not about using less it's about *wasting less*.

Here are some suggestions to consider:

- Adjusting your sprinkler nozzle to minimize flow and eliminate overspray **can save 250 gallons** per cycle!
- Replacing your clothes washer with a water-efficient version can **save 20-30 gallons** of water per load!
- Spreading a layer of mulch around plants retains moisture, which can **save 20-30 gallons** of water per day!

Looking for more tips? Visit us at [mnwd.com/watersavingtips](https://mnwd.com/watersavingtips) to find simple ways to use water efficiently.

## Additional Tools & Resources to Help You Remain Water-Efficient

Moulton Niguel offers a number of different tools and programs to help our customers continue to use water efficiently all year round. Many of these tools are available online, 24/7, and can be accessed through your mobile device. Our team is also available to walk you through these tools during our regular business hours, so feel free to give us a call or walk in to see us!

Register or log on to our customer portal to manage your water usage data, view past bills, or sign up to receive leak alerts.

# Springing into Community Events

Moulton Niguel is gearing up for a lot of great upcoming events this season. From visiting our schools to supporting community events, our Board of Directors and staff always look forward to the opportunity to meet with our customers at various public events. We also host a number of different water education workshops and landscape classes throughout the year.

Be sure to visit our online events calendar to see where we'll be next! Visit [mnwd.com/events](https://mnwd.com/events) for the latest updates.

## Special "Earth Day" Themed Landscape Workshop

Mark your calendars for a special "Earth Day" themed Sustainable Landscape Workshop on **Wednesday, April 22!** Our **free** landscape workshops help customers re-imagine their outdoor landscapes and transform thirsty lawns into beautiful, California native landscapes.

### Our landscape workshops cover the following topics:

- 💧 Taking a watershed approach to landscape design
- 💧 Using rainwater as a resource
- 💧 Selecting beautiful California native plants
- 💧 Avoiding urban runoff pollution
- 💧 An overview of the NatureScape program

For more information about this and other workshops offered throughout the year, please visit [mnwd.com/workshops](https://mnwd.com/workshops).
